Euro International School - Rewari Haryana

April 2018

9.5

Training & projects

Training-

Engineer Core, Online, India

JAVASCRIPT

MAY 2022 – JUNE 2022

- Successfully concluded an immersive 8-week training at Engineer Core, fully dedicated to honing expertise in frontend development.
- Created a clone of Myntra, the renowned e-commerce platform, utilizing a triumvirate of cutting-edge technologies: HTML, CSS, and JavaScript.

Projects-

Chat Application (Web Dev)

- To facilitate seamless global communication, enabling people to send and receive messages from anywhere in the world.
- The project aims to make it easier, simpler, and faster for users to connect with everyone, ensuring ease of use as well.

Leopard Typing Test (Frontend)

- Crafted with the intention of gauging the typing speed of individuals within a specified timeframe.
- The project enhances your focus, improves accuracy, and saves time.

Lung Cancer Detection (Machine learning)

- Developed a sophisticated machine learning algorithm achieving an impressive 95% accuracy in lung cancer detection.
- The project involves working with 3D medical images, such as CT scans or MRI scans of the lungs
